Summary

Software Engineering student with hands-on experience building backend-driven systems and data-centric applications. Strong foundation in JavaScript, Node.js, databases, and REST APIs, with a focus on writing clean, reliable, and scalable code. Experienced in team-based project development, task coordination, and delivering measurable outcomes. Quick learner who adapts easily to new tools and technologies and enjoys turning real-world problems into practical software solutions.

Education

Vidyavardhini's College of Engineering and Technology

Mumbai, India

Bachelor of Engineering in Information Technology — CGPA: 7.5/10 (current)

August 2023 – May 2027

Projects

Lab Monitoring System | *Javascript, Node.js, MongoDB, HTML-CSS* | [GitHub Repo](#)

Sept 2025 – Oct 2025

- Developed a centralized lab monitoring system to track health and system metrics of 10+ lab computers using a lightweight agent-based architecture.
- Automated real-time data collection and logging, reducing manual system monitoring effort by **~60–70%**.
- Designed and implemented RESTful APIs to fetch lab-wise and PC-wise metrics, improving data retrieval efficiency by **~50%**.
- Built a real-time dashboard to visualize system performance trends, enabling **~40%** faster issue detection.
- Implemented structured data storage using MongoDB, ensuring scalability, data consistency, and efficient querying.

Technical Skills

Languages: Python, SQL, JavaScript, C, C++, HTML, CSS

Frameworks: Node.js, Express.js, Django, React

Libraries & Tools: REST APIs, VS Code, Git/GitHub, Postman, Google DevTools, Cursor

Databases: MongoDB, MySQL

Achievements and extracurriculars

1st Place – VNPS (National Level Project Showcase)

- Won first place by presenting an AI-assisted Portfolio Management System.
- Integrated intelligent stock data analysis to support data-driven investment decisions and portfolio tracking.

Device Showcase – VCET Product Showcase (Elixir)

- Demonstrated a smart AI-powered wearable glasses solution by Bright India Tech, enabling real-time, voice-based interaction.
- Highlighted hands-free information access and intuitive AI responses through spoken prompts.
